You aren't the only one bothered by cellulite and other skin texture problems; 85% of women have cellulite.

Cellulite isn't a fat problem. The appearance of cellulite can make people feel self-conscious. Noninvasive cellulite treatment can help with the appearance of cellulite, fat and areas of skin laxity. Treat those problem areas that cause the bumps, dimples and valleys to achieve a smoother and more youthful appearance.

### How does it work?

Through laser energy and massage, areas of fat, skin irregularities and skin laxity are treated. Over several treatments, the tone, texture and appearance of these trouble spots may improve. By delivering energy and massage, tissue under the skin is stimulated and micro-circulation is increased to achieve desired results.

### What results can I expect?

You'll quickly see some improvement with optimal results apparent over several treatments. However, it is important to maintain a healthy diet and exercise regimen.

Treatment plans can be adjusted to fit everyone's lifestyle – speak to your provider regarding desired downtime, comfort, and results.\*

\*Individual results may vary and are not guaranteed.
